

CRACKING INSTEAD OF SQUEEZING

Compact & Efficient- less heat & reduced RPM speed

MULTICRACKER[®]
CRUSHING INNOVATIONS

The ideal entry into modern mill technology.

This is an energy saving machine compared to conventional hammer mills & disc mill, with energy savings up to 80%.

Effective when milling oily or moist materials.

No VSD controller required

MC 4
3.5tn/hr

ADVANTAGES

- Through variable grinding setting a more uniform structure and higher quality output in the crushed material is achieved
- No unwanted heating of the material and self-purification through high speed cutting process that can happen with hammer mills
- Homogenous crush of grains through unique disc configuration

CONFIGURATION

- Manual, stepless adjustment of the grinding gap. (Auto coming soon)
- Compact & Efficient
- No VSD required for startup.
- Foreign object protection by spring technique
- Three disc profiles- coarse, medium, fine

SPECIFICATIONS

- Throughput: Up to 3.5 tons/hr
- Input size: 157 x 102 mm
- Output size: 174 x 132 mm
- Driving Power: 1 x 4 kw Motor. 1500 RPM
- Dimensions: 912 x 444 x 336 mm (L x W x H)
- Weight: 150 kg

APPLICATION

Some products - Grains, legumes, seeds, extraction meal/cake, herbs/tea, chemicals and much more

MULTICRACKER uses revolutionary technology for effectively crushing bulk goods by a method of grinding with special Multicracker discs. It combines innovation and efficiency in one machine and can reduce power consumption. On average it takes just 1 kW of energy per tonne of material.
